

Jerry Harrell

Several people have voiced concerns about this project. They make statements but offer no evidence. Allegations but no proof. They refuse to acknowledge the answers given to their questions. In most cases, they refuse to even speak to people who simply ask questions about the project. Meeting with the project managers is stated to be a betrayal. Of whom? Of what? They do not say. I urge you not to give in to shrill hysterics. View the project with an honest eye and grant the permit.
