

Diane Laughlin

I am against every aspect of this data center. The pollution it will create is off the charts unacceptable, not to mention the water needed. Our water supply is at critically low levels. They say it will create jobs, but in the long run it will take jobs. There is no planet B. The people of Las Cruces and Dona Anna County have the right to breathe clean air. Yucca (Project Jupiter) is not being honest. This data center is being forced on the public, and no one wants it. This needs to be stopped. Please don't allow this in any shape or form.
