

Vanessa Kenner

This entire process appears to have lacked honest transparency and integrity from the jump. Project Jupiter has been forced on the public by deception and greed backing the entire project. No one I know wants this atrocity in our community, nor do we need it. It's very upsetting. Why would we agree to a facility that strips our water source, compromises air quality and inflates our utility cost? We don't want or need project jupiter!!! Although it's already begun construction without the public's consent. The meetings held for the purpose of hearing opposing views were a pathetic joke. Project Jupiter is backed by bullies and greed. Please make this end. The stress of this project is not what our community needs or wants and we deserve to be heard!!!! Elephant Butte lake is now empty and you want to put a water sucking data center here? Absolutely not!!!!
