

## James Fritzler

The Jupiter Project is a scam. Their use of politicians names in support without these people's knowledge, their constant presence in public with reps around every public corner is desperate; the physical abuse at the Santa Ana public hearing was appalling; no matter how their commercials lie, there is not enough water from a state reeling from drought; similar projects in other states have been disastrous. And those are just a few of the arguments against the corporate bullies that are behind this. No. No. No. No. No.
