

Sarah Weschler

There is nothing a massive data center in the middle of an already resource depleted area can do for the people long term. I don't know who's getting rich off this, but it's not regular New Mexicans that are already dealing with poor air quality. New Mexicans will be sacrificed to this beast if it is allowed to grow fat off of our land, resources, and labor. Protect our lands. Protect our people. Please don't sell us to the beast.
