

## Lyle J Greenberg

You MUST not pass this rule!!! In a state that seems completely committed to destroying businesses and jobs, even this seems hard to believe. The employees who have jobs that you seem to want to destroy know full well the conditions that they work in. The proposal that an employee would work for only 20 minutes every hour if the "heat index" is above 90\* is nothing less than STUPID. Is the employer going to be allowed to pay the employee 33.3% of his wage if he is only working 33.3% of the time. Of course you are not going to allow that. So an employer will be forced to raise their prices by a huge amount or go out of business. There is quite literally no other alternative when your rule would reduce productivity by 67%! If this state is ever going to thrive economically, the leaders must stop their war against private industry and help, not hurt, the economy of this state!
