

Debbie Reynolds

Hello, I'm writing in opposition to EIB25-11 which seeks to protect employees from heat related illness. I'm not opposed to protecting workers from all manner of calamity. However, EIB25-11 is overreaching and meddlesome. Please let construction companies, landscapers, and others who are in outdoor endeavors protect their employees. They will do so because it's costly for them to have injured people accompanied by workman's comp claims. Thank You.
