

Donna Crawford

In the matter of EIB 25-11 (R), Heat Illness and Injury Prevention (Heat Exposure Rule): "There is no reason for state bureaucrats to expand their reach and dismantle standard industry operations that have suited both employers and workers for decades." This says it all. Leave it to the left-wing-operated NM Occupational Health and Safety Bureau to come up with this cockamamie idea of employees working for 15 minutes and then taking a 45 minute break every hour! These kinds of bleeding-heart liberal proposals are what is killing businesses in NM. Businesses are having a hard time in this state without locking down more rules and regulations.

EIB, please do not adopt this ridiculous proposed rule.
