

Tina Cason

I oppose this bill. There are many occupations that required outdoor work and has since the beginning of time. Firefighters, farmers, ranchers, construction workers, equipment operators, oil and gas workers are essential to the success of our nation. Awareness and training is great we want people safe at work, but restricting them is an over reach of government. People can climatize to their environment and should. An employee is can not control an employees actions off work. Alcohol and energy drinks dont help hydrate and prepare the employee for work the next day but will effect how they handle heat.

When discussing kids and school implementation, there needs to be a discussion regarding the budget that comes along with this. School budgets are being cut but the state wants to implement more requirements without how to pay for and implement the requirements.

I disagree with the state and this bill.
