

JANIS MOSS

Your proposed "heat index" regulations are a perfect example of extreme government over reach! Plus, a perfect example of why businesses cannot make it in this state. Adults are perfectly capable of drinking water as their body needs it, and they can file a complaint if their employer does not give them their breaks. And to expect a business owner to keep the log for 5 years, ridiculous!

My final response to this ridiculous mandate is, whoever had the time to make up all these stupid rules, doesn't have enough to do except waste time dreaming up worthless rules.
