EIB 25-11 (R) - Proposed New Regulation, 11.5.7 NMAC - Heat Illness and Injury Prevention

No person who works at school should be subject to extreme heat or cold. I have experienced both during my 23 years as an educator. Furthermore, students should be legally allowed to have a water bottle. Many teachers don't allow because students place a pinhole in the cap and make them water guns. We live in the desert. Everyone needs to drink plenty of water.
