

Members of the Environmental Improvement Board -

Project Jupiter represents the kind of investment that helps communities prepare for the future. It creates opportunities for today's workforce while encouraging the next generation to pursue careers here in New Mexico.

I believe responsible development and environmental stewardship can work together, and I respectfully support approval of the air quality permit applications.

Thank you for your consideration.

A handwritten signature in black ink, appearing to read 'Ivan Carrillo', with a horizontal line extending to the right.
