

Dear Environment Department Board Members,

I respectfully submit this comment in support of the air quality permit applications for Project Jupiter.

New Mexico has a unique opportunity to become a leader in advanced technology and digital infrastructure. Projects like this create high-quality jobs while also supporting countless businesses that provide materials, equipment, transportation, engineering, and professional services. I believe this investment will have lasting benefits for Southern New Mexico and respectfully encourage approval of the requested permits.

Thank you,

A handwritten signature in black ink that reads "Leslie Flores". The script is cursive and slightly slanted to the right.
