

To the Environmental Improvement Board:

I appreciate the opportunity to submit this comment in support of Project Jupiter. New Mexico has spent years working to attract employers that offer long-term careers and diversify our economy. I believe this project represents another step in that direction.

Major investments like this don't just benefit one company, they create opportunities for construction workers, suppliers, local businesses, and the communities that support them. I respectfully encourage the Board to approve the requested air quality permit applications.

A handwritten signature in blue ink, appearing to read 'Janeth', with a stylized flourish at the end.
