

New Mexico Environment Board Members:

I wanted to take a moment to express my support for Project Jupiter.

Southern New Mexico has tremendous potential, and projects like this help unlock new opportunities for businesses and families alike. From construction and engineering to local suppliers and service providers, the economic benefits of a major investment extend far beyond the project itself. I believe this project can help strengthen the region for years to come and respectfully ask that you approve the air quality permit applications.

A handwritten signature in black ink, appearing to read 'Juan Pablo', is positioned above a faint rectangular stamp.

Juan Pablo
