

To the New Mexico Environment Department:

Thank you for the opportunity to submit this comment.

Project Jupiter has the potential to become one of the most significant economic development projects in Southern New Mexico. Investments of this magnitude create opportunities for skilled trades, engineers, transportation companies, local vendors, restaurants, hotels, and numerous small businesses that support a growing economy. Those benefits can be felt well beyond the project site and continue for many years.

I respectfully support approval of the air quality permit applications.

A handwritten signature in black ink that reads "Andrés Corral R." The signature is written in a cursive, slightly slanted style.

Andrés Corral R.
