

Dear Members of the Board:

Project Jupiter represents more than a single facility—it represents an investment in the future of Southern New Mexico.

Large projects generate work for contractors, engineers, equipment suppliers, transportation companies, and many other local businesses. Those economic benefits help strengthen communities while creating opportunities that can last for generations. I respectfully support approval of the requested air quality permit applications.

Thank you for your consideration.

A handwritten signature in black ink, appearing to read "Rios", is positioned above a faint, light gray rectangular stamp. The signature is stylized with a large, sweeping initial letter.

Rafael Rios
