

Katherine Page

I demand the extension of the permit to allow the communities voice to be heard regarding Project Jupiter. New Mexicans deserve transparency on anything that will affect our quality of life. Yucca Growth Infrastructure LLC has neglected to take New Mexicans opinions, their concerns, and safety into consideration. We already live in a serious drought and in an area with negative air quality. Project Jupiter will only exasperate these issues. New Mexicans deserve a healthy environment to exist in and Project Jupiter will not create this. New Mexicans, regardless of political affiliation, have a love of the land and say NO to Project Jupiter.
