

Lily Crudden

We do not want polluted air. The air quality in this area is already not up to standard. If it is polluted more, it will spread and kill all plants, animals and pollute any water source nearby. Climate change is already affecting the world at an alarming rate and this project will only increase the damage that is being done to our planet. No one wants this. Local people are protesting. Why do you not care? Disgrace to humankind. Be better.
