

CJ Pennington

Project Jupiter brings absolutely zero benefit to anyone living in New Mexico besides the very people who want it's construction- which is without the consent of the people. We do not want this void in our natural economy of very little water and rising heat to take what little we have. It should not require much judgement to know this would only benefit a small percentage of our country and state, and not in any form that helps the public or infrastructure.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
