

Caleb Saunders

As a New Mexico resident, I am writing to express my strong support for Project Jupiter.

I believe Project Jupiter represents a responsible investment in New Mexico's future. The project will create high-quality jobs, strengthen the state's economy, and provide lasting benefits to local communities through investments in schools, infrastructure, water systems, and workforce development.

I also appreciate that Project Jupiter is being designed with advanced technologies to minimize water use and improve environmental efficiency. These efforts demonstrate a commitment to responsible resource management while supporting economic growth.

I respectfully urge the New Mexico Environment Department to approve Project Jupiter's air permit so this important project can move forward and deliver its long-term benefits to New Mexico and its residents.
