

Ellen Dornan

This project should NOT be approved under any conditions. We do not want this data center or need this data center. It will pollute and use up resources we the people of New Mexico need. We do NOT need an AI driven surveillance state. We do NOT want to sacrifice our clean air or even one drop of water to this wholly unnecessary project. New Mexico Environment Department should be serving the interest of the people of New Mexico, and this project will not benefit us in any way, it will only bring harm. Please deny any permit Project Jupiter requests.
