

Tenika Sosa-Gonzalez

As a south valley resident and co-owner of a business who profits from moving heavy equipment for infrastructure and new developments, I stand strongly opposed to granting this permit.

The long term health and wellbeing of my children and community far outweighs any short term financial gain of any business owner.

As a nurse who works with disparate populations, the exploitative nature of this project is clear and the repercussions will last for generations.

I implore you, please do not approve this permit.
