

Abigail Gonzalez

We need to help prevent climate change. Climate change will end up killing and bringing thousands of animal species towards extinction like polar bears. They're numbers are going down they can't adjust fast enough to become warm climate animals as their habitat is melting Which leaves them without habitat and without their sources of food brining them closer to the brink of extinction. We should all work together and stop climate change. (Anonymous)

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
