

Melissa Bennett

Hello,

My name is Melissa and I'm here today to express my deepest concerns were this permit granted. Resources are already stretched beyond capacity. Cost of living is skyrocketing and the profits gained from these types of infrastructures will not be returned to the communities who suffer at their expense. We cannot lose foresight of how critically these centers will immediately impact our lives. It's my request this and similar permits be denied. We don't want this here.
