

You don't need to know You don't need to know

This is a climate disaster. The ice caps have been melting. Sea levels are rising. More people die from the heat already. Yet you want to make it worse. Cause more suffering. Just so you can create a stronger AI. AI is the worst thing that humans can be focusing on, it creates people who are stupider because they rely on AI for information. You are drying up rivers and using up the drinkable water just so the billionaires, the people rich enough to prevent and possibly end world hunger and water issues in Africa, can get richer. You will separate society into two. The moral and immoral. And the billionaires are already immoral. Nobody makes that much in ethical ways. You are killing your species just so you can get more money. The billionaires do not deserve to be called human. They are all devils in disguise. They are incubi, feeding on the suffering of humans to grow stronger and richer. End AI.
