

# Ivan Aragon Copina

I am writing to express my absolute disapproval of Project Jupiter. I believe it only brings harm to the community, climate wise, and socially.

At most it will offer 100 jobs with no guarantee any of them will go towards New Mexicans. It's only set to increase energy costs, and destroy our already limited water supply. The quality of water will suffer for it. Areas around the country from California, Arkansas, and others with data are already seeing these devastating effects to necessary infrastructure. This is an absolute to our community and it should have never been approved in the first place. No air purifier will make this okay. It also shows New Mexico is primed and ready to be ravaged by corporate bodies with enough money to get what they want.

I urge the New Mexico Environment Department to disapprove this project.

Sincerely,  
Ivan Aragon
