

Alexandra Cousins

I am a resident of Santa Fe County and I am asking that you deny Yucca Growth Infrastructure's air quality permit. It is unethical, a danger to the environment, the community and the future of people and nature in New Mexico. It would further poison our environment. It would waste billions of gallons of water, a valuable and shrinking resource in the desert. Please protect the people, wildlife and natural resources of New Mexico from this.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
