

Holly Mata

As a NM resident, I urge you to deny the application as submitted. The public - especially people living in Doña Ana County and the borderland - should have additional time to review this application. There have not been enough meaningful opportunities to participate in public hearings in English and in Spanish, and community members deserve to have public hearings in person and virtually. There are so many unanswered questions, and too few clear answers. People in Doña Ana county are already unjustly exposed to high levels of air pollution, and permitting the extremely high levels of pollution generated by this project will have dire consequences for people and communities.
