

Luis Samaniego

To the members of the Environment Board:

I believe New Mexico should continue pursuing opportunities that strengthen our economy while protecting the qualities that make our state unique. Project Jupiter represents an opportunity to create quality jobs, encourage innovation, and attract additional private investment to Southern New Mexico.

I appreciate the project's continued engagement with the community and its willingness to work through the permitting process. For these reasons, I respectfully support approval of the requested air quality permits and thank you for your service to the people of New Mexico.

Sincerely,

Luis G. Samaniego
