

ELIZABETH Thomson

I am writing to express my disgust for Project Jupiter. It would be a tragedy for New Mexico if this is approved. They lied in their original statement and continue to lie. Our beautiful New Mexico skies and land will be damaged. The extravagant water use is unthinkable. We are in a severe drought, with scientific experts warning it will only worsen. The Oglala aquifer is being depleted. We cant use data to quench our thirst, hydrate our domestic or wild animals and birds, or grow food.

I urge the New Mexico Environment Department to kill this travesty!
