

Holden McDaniel

I oppose the project on the basis that it is near universally seen as a bad thing and that democracy necessitates that oligarchs not be able to over rule the will of the people. The "volunteers" who deceived many into signing their consent to this project acted so deeply immorally that one can not do anything but oppose this project. Further, the projects very basis is anti-human— as humans I hope we all can see the lack of value non humanity brings to our lives.
