

Melissa Arcila

Please stop this project, it is incredibly insensitive and very concerning how this project is trying to brainwash New Mexicans into thinking they'll provide more good than harm, I'm currently 4 months pregnant and the thought of a data center this size being built in my own backyard is horrifying, the lack of water we already have to begin with and now with a billion dollar project that comes in and does not prioritize the safety of the people and the environment, please let us have a future and conserve the beautiful state we have.
