

David Wren

I am writing to express my disdain for Project Jupiter, which I believe offers ZERO benefits for our community and will in fact wreak havoc on our existing infrastructure and fragile wildlife environment, not to mention potential health problems and the already strained water resources.

Project Jupiter is based on the same misinformation used by other Data Center proposals. These centers have already caused many irreversible disasters wherever they have been implimented. I urge those backing this fiasco to read and research the factual information AGAINST these centers and indeed to question the NEED for them. The United States already has more Data Centers than any other country. Why further endanger our wildlife, environmental resources and personal health with yet ANOTHER SURVEILLANCE FACILITY, while they are being SHUT DOWN nationwide?

I also urge the New Mexico Environment Department to DISAPPROVE this potentially disasterous project, dangerous to our environment, our wildlife habitat and water resources AND, the latest concern, PERSONAL HEALTH ISSUES for those being exposed to the detrimental by-products of this harmful environment.

Thank you in advance for seeing how harmful this project WILL BE for Dona Ana County and New Mexico and halting plans to continue this problem-causing undertaking.

Sincerely,
David E. Wren
