

Nicoleta Popa

This planet is dying because of us and we're already seeing the effects of this through the heat wave going through Europe. A data center of this size and caliber would do so much damage to the environment, worsen our current situation so much and for what? For chatgpt to give more answers to basic questions? AI is not a necessity, people have forgotten to do things on their own due to getting so much help to the most basic of questions and tasks from AI. What we ACTUALLY need is to nourish our planet as much as possible so we have a place to live in peace and avoid more severe weather disasters that are bound to come our way at this rate.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
