

Miyah Cole

Please stop Project Jupiter before it does irreversible damage to the communities surrounding it and the overall environment! We do not need data centers draining the Rio Grande or other water sources needed to survive. AI could be a useful, reliable tool used to save lives, however, the only thing it is doing now is pointing humanity into a direction of extinction. Humans do NOT need AI to live and resources like water, that are being threatened, should be priority. I beg to reevaluate Project Jupiter and in doing so, take into account the lives that will negatively be affected. People deserve clean and accessible water. Not to mention the air pollution and hazardous waste that will be a result of these plants. It is disgusting and inhumane to be cruel to this world. We don't have enough trees to absorb the CO2 because we keep cutting them down. We don't need new apartments, fast-food restaurant or data centers. We need politicians to care about the longevity of human, animal, and planet life.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
