

Mikaela Smith

I completely oppose the Jupiter Project.

This project would release no less than 12 million tons of green house gas emissions a year. I, as a member of this community and resident breathing in this state's air value clean air far more than AI. Not to mention the water usage of this project would have a devastating impact on our already struggling state.

There is no contingency in the contract for construction for in state companies. So the argument for new jobs to the people is a false selling point.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
