

## nodata centers

In protest of Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction Permit;  
Application Permit No. 10883 and

TEMPO Agency Interest No. 41351

We do not need infrastructure that harms the environment any further, especially in a location that is already struggling with water rights. This would be incredibly detrimental to the fragile ecosystems here in the State. Our focus should be environmental harm reduction. In fact, direct air capture should be the focus, removing the harm already done by companies like this, not contributing >75,000 tpy (CO<sub>2</sub>e). Invest in ways to reduce pollutants and eliminate them completely. There is absolutely no reason for this to happen here in New Mexico. I ask that the NMED refuse to grant this application, as there are threats to the land, water, and atmosphere at risk because of infrastructure, such as this applicant.
