

R Fultz

The air quality permit **MUST** be denied. These corporations do **NOT** share public interests. They have a history of exploitation and unethical practices. Bloom Energy's own history of illegal dumping of hazardous waste is unforgivable. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. Approving this permit would be government-sponsored environmental racism, as residents of Doña Ana County (and El Paso County) are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. New Mexico, us El Paso residents rely on your humanity and dedication to ethical environmental mindfulness because Texas sure isn't looking out for our combined region. Project Jupiter should be **CANCELLED** and **SCRAPPED**. Entirely. Full stop.
