

sal burracho

I am a resident of texas and I am asking that you deny Yucca Growth Infrastructure's air quality permit. If you add this rio grandes biome will be destroyed not only that it will admit 10 million tons of carbon dioxide annually. Think about how many families that puts at risk. No way is this data center more important than human life. without human like every thing would be pointless. even this data center. we lived without AI for most of history, if we lived without it before we can live without it again.
