

Angelia Donnelly

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. If not, you are taking away from the community unjustly and without their consent/knowledge. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. This would not be beneficial for the data center and there would most likely be plots to stop supporting AI and its uses, rendering it useless. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules.
