

Kaira Trout

The amount of greed and ignorance needed for someone to be in support of this project is ridiculous. And to know that so many of our officials are part of this greedy, ignorant population is very alarming. It's already disgusting how hard it is to maintain a decent quality of life. This project feels like a malicious act. Lying about it makes it even worse. Stop lying to us! A good chunk of us already know what is going on and we are not falling for it. We won't stop fighting for the lives of our communities.
