

Haley Grant

Project Jupiter is fraught with severe environmental, health, and energy risks. This is nothing new to the many other rural areas that have suffered and opposed data centers that pits billionaire hyper-expansionism against the health and well-being of the people. NMED must extend the comment and period another 60 days and deny Project Jupiter's air quality application permit recognizing that Bloom's projects are environmentally destructive and dishonest. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. NMED must grant a public hearing in Santa Teresa if the permit is not denied.
