

Marisol Cueto-Silva

"Fuel cells also create hazardous waste and the fuel cell provider for this project has a history of illegally dumping this waste and hiding it for several years. This company will likely repeat its bad habits, illegally dumping dangerous and undisclosed chemicals into our public landfills, and we will just have to wait until somebody notices? Our county has and continues to face an illegal dumping epidemic so how can I be sure that these systemic oversight failures we have locally won't continue and expand to include this dangerous and experimental fuel cell operation. A fine for illegal dumping does not undo damage or its spread once our aquifer and soils are contaminated. It also will not re-capture the volatile chemicals that are released into the air when hazardous waste is improperly stored and disposed of.

The world and the people here are more important than any project being created."
