

Alexandra Ma

We do not need to be making more data spaces when many communities are actively losing clean water, around 40 Miles from where I live, the local lake has gone down by 4 feet of water and this is not normal. The government needs to stop being selfish and stop encouraging the development of data spaces just for ai which will end up being a dying industry with in a few years.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
