

Cinthia prieto

The United States does not need more data center. They use drinking water from communities that already struggle and will harm the environment. The true question that must be posed is what will this giant project do for the communities other than fill the pockets of millionaires that do not care about the planet, animals, or people.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
