

Zoe Unruh

To Whom It May Concern,

My name is Zoe Unruh. I am a nurse and have been working with New Mexican communities for the past 4 years. New Mexicans have lived through generations of environmental harms from Uranium mining to nuclear testing. We do not need to add additional pollutants to the air and compromise the health of our communities even more. This project will affect the health of the most vulnerable in our state through air and water pollution, energy usage, and water consumption. I am asking you to center New Mexican community voices, particularly indigenous voices who have always stewarded this land, and reject the Yucca Growth Initiative's permits.

Thank you for your time.
