

Charlotte Lewis

I am writing to voice my strong opposition to the proposed permit. Yucca Growth Infrastructure is planning to install polluting natural gas fuel cells that will contribute to poor air quality and health outcomes for our communities. The submitting company has attempted to obfuscate the true affects of these fuel cells. Furthermore, their subsidiaries have been cited in the past for illegally dumping waste. The project as a whole is opposed by the people of New Mexico, and the builders are avoiding true public comment and attempting to subvert the people's will. I strongly oppose the issuing of this permit. They need to answer public comment about the nature of the project and waste-management plans before this can be considered.
