It's so typical that Project Jupiter would prey on one of the poorest states in the nation. Because who cares if our 2 million residents have to pay more for electricity, get contaminated drinking water or have toxic air quality, right? I'm against this 100%. I'm also tired of your opaque communication and your manipulation of the ignorant. You wont bring jobs. You'll bring pollution and destroy our resources. I'm glad to see so many citizens pushing back. I hope it means your plan is cooked and you will fail.
