Project Jupiter is a gross violation of the rights of not only New Mexico residents, but residents of the entire country and indeed the world. This data plant will certainly cause generations of health complications resulting in death, disablement, and birth defects. It will dry up our river, the source of life for our communities near and far. It will dump unheard of amounts of pollution into our skies, traveling miles to affect people and ecosystems far from us. This permit must not be granted. As the Department is well aware, allowing the construction of this project to continue would in effect sentence generations of New Mexicans and our neighbors and families outside of the state to damage that is enormous and impossible to calculate as yet. DO NOT GRANT THIS PERMIT!
